Transformatoren

In den meisten Fällen sind Leistungstransformatoren individuell gestaltet und auf die Bedürfnisse der Kunden abgestimmt. Die Berücksichtigung aller erforderlichen Spezifikationen, Anforderungen und gesetzlichen Normen gehört zur sorgfältigen Planung dazu. Folgende Parameter helfen beim Gestalten eines Transformators*:

- Topologie (Sperrwandler, Push-Pull)
- Eingangsspannung (V), Ausgangsspannung (V), Ausgangsleistung (VA), Ausgangstrom (A)
- Schaltfrequenz (kHz)

- Temperaturanstieg (°C)
- Abmessungen (mm) (LxBxH)
- Sicherheit, Isolierung und Systemanforderungen (zB IEC, UL, Funktions- oder Basisisolierung)

* Auf Wunsch kann eine Checkliste von CODICO bereitgestellt werden.

- Topology (Flyback, Forward, Push-Pull)
- Input Voltage Range (V), Output Voltage (V), Output Power (VA), Output Current Range (A)
- Switching Frequency (kHz)
- Temperature Rise (°C)
- Mechanical Dimension (mm) (LxWxH)
- Safety and Insulation System Requirements

*On request, a checklist/design worksheet can be provided by CODICO.

Transformers

In nearly all cases power transformers are custom-designed and need to be planned very carefully. To meet all required specifications and demands, following features have to be taken into consideration:*

FILTER CHOKES

TYPE		SUPPLIER					APPLICATION
		EATON	ELYTONE	KEMET	SAGAMI	SUMIDA	
EXAMPLE							
Power Line	SMD	CMS1 CMS2 CMS3	ET-52300A ET-52600		TDG6029C (Audio) TQRxx	DP-F14	AC/DC DC/DC Automotive Power Supply
	THT		ET-52300 ET-52400 ET-52500 ET-52800 ET-52900	SSxx SSR21Hxx SSR21HSxx SCxx SCRxx SUxx		DP-xx LFxx NFCxx UUxx PFCxx	
FEATURES	Rated Current	0.75A~7A	0.1A~10A	100mA~40A	1.4A~7A	0.2A~16A	
	Inductance	4.5µH~1.3mH	0.5mH~30mH	250µH~138mH		3.3mH~112mH	
	DC Resistance	2.7mΩ~620mΩ	0.07Ω~8Ω	1.8mΩ~5.9Ω	2mΩ~40mΩ	0.027Ω~5.2Ω	
	Operating Temp.	-40 to +160°C	-40 to +130°C	-40 to +120°C	-40 to +125°C	-40 to +125°C	
Signal/Data Line	SMD	ACE1Vxxxx	ET-52700		TQRxx	CBMxx CPFCxx CRRxx CSxx	CAN-BUS IEEE1394 USB LVDS DVI HDMI Smart Entry System
	THT					SFCxx	
FEATURES	Rated Current	70mA~400mA	4A~7A		1.4A~5.6A	0.2A~6A	CAN-BUS IEEE1394 USB LVDS DVI HDMI Smart Entry System
	Impedance	90Ω~50kΩ	250Ω~550Ω		100Ω~1kΩ	100Ω~1000Ω	
	DC Resistance	0.3Ω~4.8Ω	0.016Ω~0.020Ω		3mΩ~40mΩ	0.0195Ω~5.32Ω	
	Operating Temp.	-40 to +105/125°C	-25 to +120°C		-40 to +125°C	-40v to +125°C

Filter Chokes

Während Funkentstörung bei AC/DC Konvertern hauptsächlich ein Thema am Eingang ist, muss man bei Invertern an Ein- und Ausgang mit unerwünschte symmetrische und asymmetrische Störungen rechnen.

Während Katalogtypen von Gleichtakt- und Gegenakttdrosseln hauptsächlich auf 1-phasige Anwendungen abzielen, erfordern 3-phasige Applikationen oder besondere Lastströme häufig kundenspezifische Lösungen. Um das beste Filterresultat erzielen zu können, müssen sowohl Gleichtakt- als auch Gegenakttdrosseln entsprechend Ihrer Anforderungen designed werden. CODICO deckt ein weites Spektrum von Katalogtypen von EATON, KEMET, SAGAMI und SUMIDA ab, ebenso wie kundenspezifische und semi-kundenspezifische Lösungen von ELYTONE und KEMET.

takt- als auch Gegenakttdrosseln entsprechen den Anforderungen designed werden. CODICO deckt ein weites Spektrum von Katalogtypen von EATON, KEMET, SAGAMI und SUMIDA ab, ebenso wie kundenspezifische und semi-kundenspezifische Lösungen von ELYTONE und KEMET.

at input and output. Whilst catalogue Common and Differential Mode Chokes are mainly for 1-phase systems, 3-phase applications or particular load currents require customer specific chokes. To achieve the best filter result Common and Differential Mode Chokes need to be designed according to your requirements.

Filter Chokes

While noise suppression is mainly a topic at the input in AC/DC converters, inverters need to handle undesirable symmetric and asymmetric interferences even

CODICO can cover a wide range of catalogue solutions from EATON, KEMET, SAGAMI and SUMIDA as well as customized and semi customized solutions from ELYTONE and KEMET.

PLC Koppeltransformatoren

CODICO bietet ein weites Spektrum an kunden-spezifischen PLC Koppeltransformatoren von ELYTONE. Einige haben, auf Grund der Beliebtheit, bereits einen ähnlichen Status wie Standardartikel erreicht. Die Transformatoren erfüllen die Anforderungen von HomePlug GreenPHY™ und anderen gängigen Standards auf Anfrage. Die Anwendungen reichen von Home Automation bis hin zur Kommunikation von Elektroautos mit der Lade-station während des Ladenvorgangs.

PLC Coupling Transformer

CODICO offers a wide range of customized power line coupling transformers from ELYTONE. Some of them already received a similar status as standard items. The transformers comply with the requirements of HomePlug GreenPHY™ and other standards on request. Applications reach from Home Automation up to the communication of Electric Vehicles with their charging station while charging.
